

Founding Engineer Position - Technical Assessment

Introduction

This assessment is designed not only for us to evaluate your technical skills and way of approaching engineering challenges, but also to give you a sense of what it will be like to work as a founding engineer at BetterBasket.

Problem

You are given [two datasets](#) of grocery items sold online by Grocery Store A and Grocery Store B, respectively. Our customer, Grocery Store C, operates within the same geography as the aforementioned stores. To validate their pricing strategy, Grocery Store C needs to identify the largest pricing discrepancies between Grocery Store A and Grocery Store B for items that both stores carry.

Solution

Please help solve the problem for Grocery Store C using Python and submit your code along with your results by replying to this email.
